### EXAMINER'S AMENDMENT

The after final amendment filed on 7/24/07 has been entered.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicant's representative Mr. Tom Seitman on 8/22/2007.

The application has been amended as follows:

Claim 12. Embryonic stem cells [into which the trap vector of any one of claims 7, 8, or 21 is introduced] comprising the trap vector of claims 7, 8, or 21.

The following is an examiner's statement of reasons for allowance:

The vectors (a)-(i) recited in claims 7 and 21 are allowable because they are free of prior art. The combined teaching of the closest prior art Leboulch et al. and Araki et al. (cited in the previous office actions) do not render obvious of the vectors recited as (a)-(i) because there is no rationale of including a plasmid vector to the retroviral vector taught in Leboulch et al. Although there is no specific definition of the term "plasmid vector/PV" in the specification, it is interpreted as an intact plasmid vector based on the teaching on page 11, which teaches that such plasmid is used for plasmid rescue, and the example of such plasmid vector given on page 7, lines 7-9. As such, although each individual elements of the claimed vector are known in the prior art, there is no rationale to combine them to arrive at the claimed invention. Therefore, claims 7, 8, 11, 12 and 21 are allowed.
